

Mentor Table Coastal Camera Club

The Coastal Camera Club provides a Mentor Table at each bi-monthly meeting. One hour, from 6:00-7:00 is allocated for the Mentor Table at each meeting. The Mentor Table Committee is staffed by Ken Arni, Anne Rhoads, Dick Rhoads Tom Fluharty and Sue Eberhart. Volunteers with expertise in the many areas and facets of photography are encouraged and welcomed to help provide an encouraging and supportive atmosphere for new members to develop their skills as photographers.

The goal of the Mentor Table is to educate new and intermediate level club members with the information and skills necessary to be competent and confident photographers. It is hoped that these members will advance from taking “snap shots” to taking an image.

This year’s plans to accomplish the goal will focus on learning the camera, “Hands on Camera Night”, and topics fundamental to photography such as shutter speed, lighting and exposure. Interactive programs, demonstrations, field trips and other types of programs are planned to help all members, but in particular, the novice photographer, accomplish the Mentor Table’s goal. [In addition, a computer will be available at each Mentor Table session for members wishing advice and/or information regarding a photograph, an editing program, the club’s workings or any other photography question or concern.](#)

We also hope to engage more advanced and seasoned photographers as coaches, mentors and program presenters. Please let a Mentor Table Committee member know if you are interested in helping the group in any way.
